

Clean Air Partners Board Meeting

Education Program Updates

Elizabeth Spike

Education Program Manager

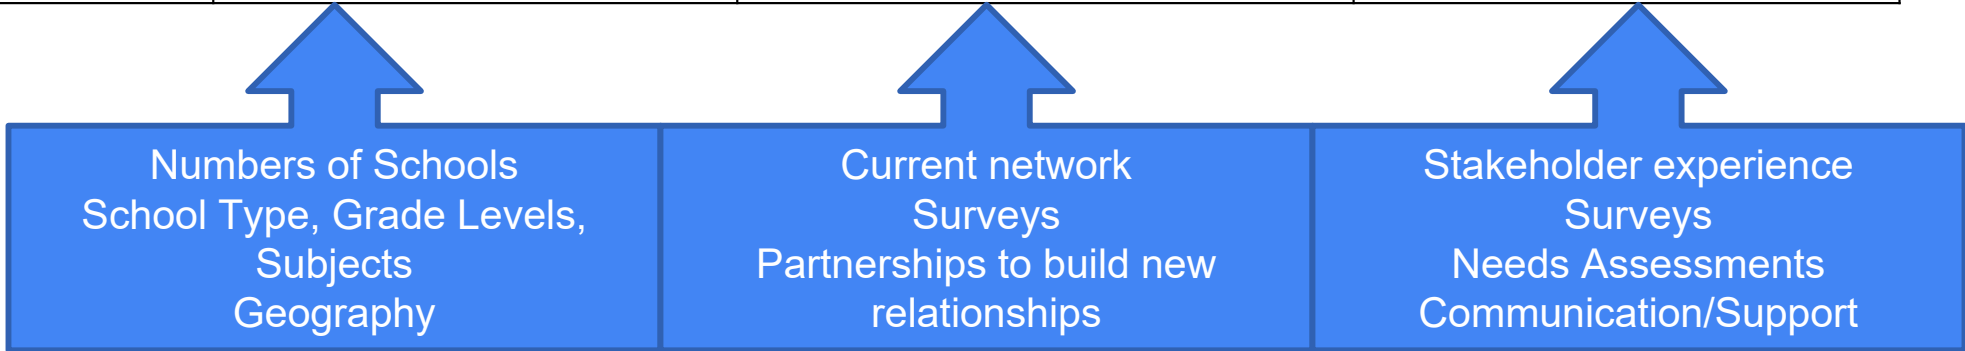

September 19, 2024

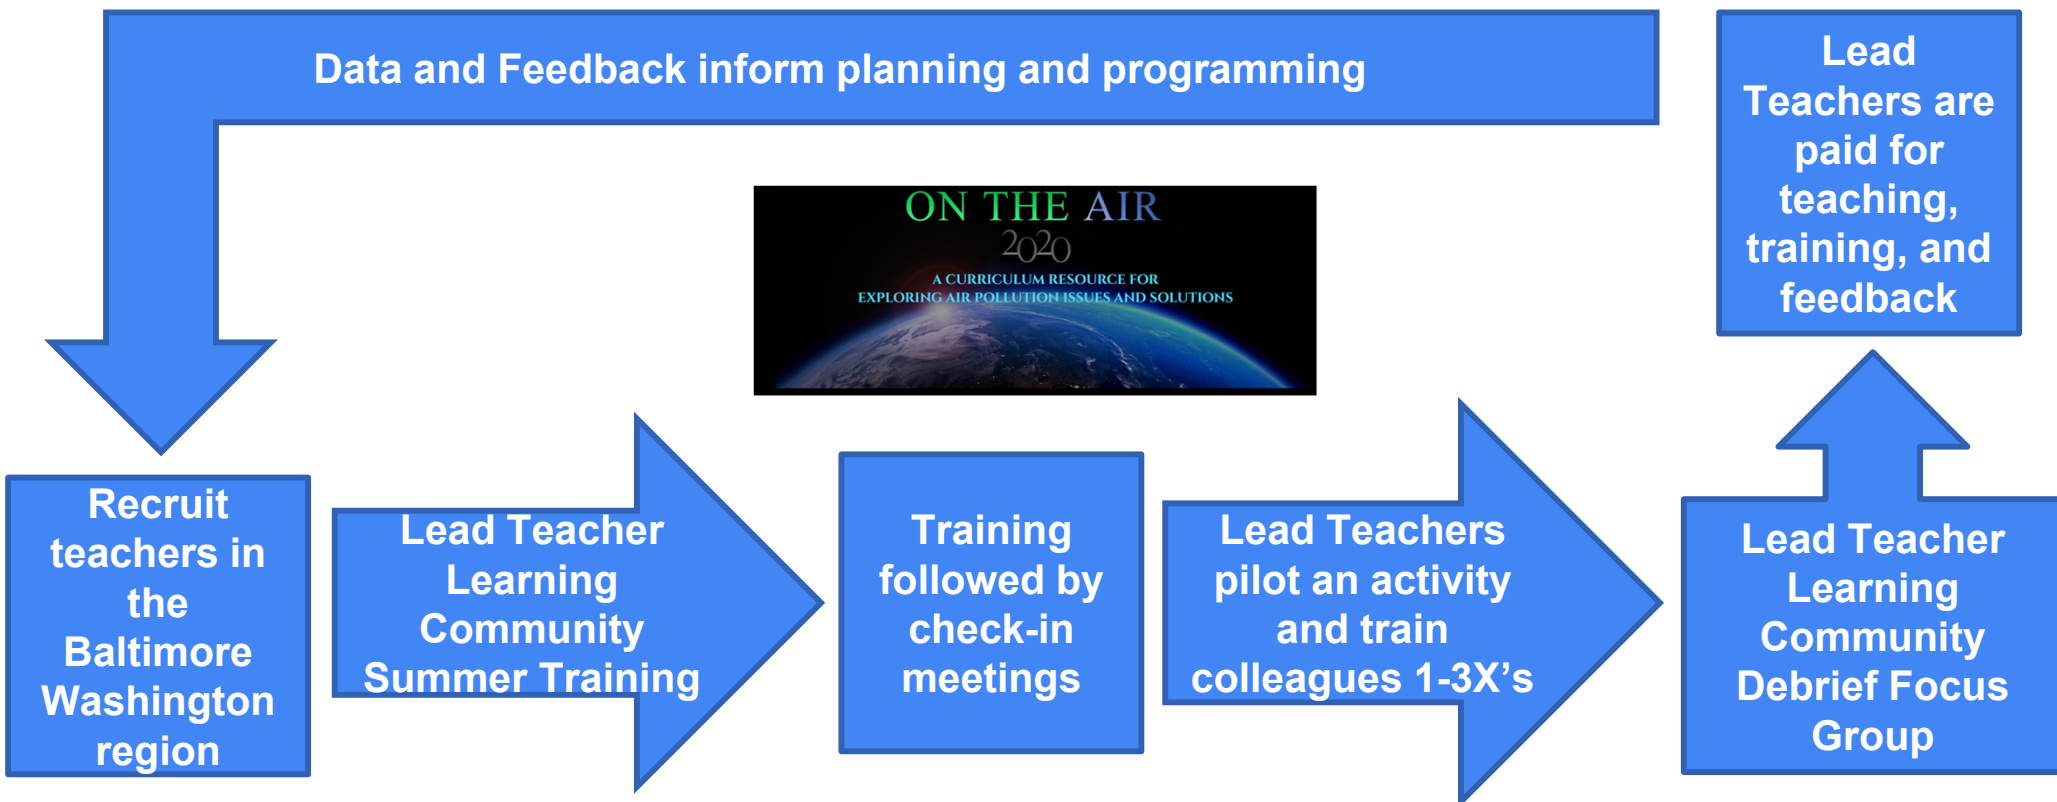

How can we educate students to transform awareness of air quality and climate change into personal actions that protect their communities in the Baltimore-Washington region?

Objective: Promote the use of <i>On the Air</i> curriculum. (FY 2023 Work Plan)			
Activity	Target CAP participating member school systems, charter, private, and independent schools in the District of Columbia, Maryland, and Northern Virginia.	Build relationships with stakeholders in public, charter, private and independent schools, school districts, and teachers of grades 5-12 across the BW region to create legacy and longevity for the CAP's Education Program.	Develop evaluation tools to conduct a needs assessment and gauge the extent of promoting the <i>On the Air</i> curriculum and Train-The-Trainer model in the BW region.

DATA / METRICS

On the Air Train-the-Trainer Model

2024-2025 Lead Teacher Learning Community

Held monthly info sessions to recruit teachers Jan-May 2024

Deadline to apply with signed/dated MOU June 14

Received 17 applications, 14 accepted, 13 active Lead Teachers

3 summer trainings: June, July, and August

15 hours training including meet and greet with a CAP BoD
